SECTION 4: First-aid Measures

First aid measures general

If medical advice is needed, have product container or label at hand.

First aid measures after inhalation

If inhaled, remove to fresh air and keep at rest in a position comfortable for breathing. Obtain medical attention if breathing difficulty persists.

First aid measures after skin contact

Rinse immediately with plenty of water. Gently wash with plenty of soap and water. Obtain medical attention if irritation persists.

First aid measures after eye contact

Immediately rinse with water for a prolonged period while holding the eyelids wide open. Seek medical attention if material is embedded in eye. If eye irritation persists: Get medical advice and attention.

First aid measures after ingestion

If swallowed, do not induce vomiting: seek medical advice immediately and show this container or label. Drink 1 or 2 glasses of water. If vomiting occurs, keep head low so that stomach content does not get into the lungs.

Symptoms/injuries

Repeated or prolonged inhalation may damage lungs.

Symptoms/injuries after inhalation

May cause irritation to the respiratory tract, sneezing, coughing, burning sensation of throat with constricting sensation of the larynx and difficulty in breathing.

Symptoms/injuries after skin contact

Prolonged contact with large amounts of dust may cause mechanical irritation. Dust may cause irritation in skin folds or by contact in combination with tight clothing.

Symptoms/injuries after eye contact

Redness, pain.

Symptoms/injuries after ingestion

Abdominal pain.

Chronic symptoms

Respiratory difficulties.

SECTION 5: Fire-fighting Measures

Fire Hazard: Will not burn

Extinguishing Media: Use ABC type fire extinguisher for surrounding fire

Special Firefighting Procedures: None

Unusual Fire and Explosion Hazards: None

Reactivity: Keep away from strong oxidizing agents and from heat and ignition sources.

Protective Equipment for Firefighting: Self-Contained Breathing Apparatus and clothing for chemical fires.

Protection during Firefighting: Use normal individual fire protective equipment.

SECTION 6: Accidental Release Measures

Personal Precautions/Protective Equipment

Do not touch damaged containers or spilled material unless wearing appropriate protective equipment. Keep upwind. Keep out of low lying areas. Ventilate closed spaces before entering.

Environmental Precautions

Prevent further leakage or spillage and comply with local, state, and federal regulations.

Methods and materials for containment and clean up

If product has dried, avoid generation of dust during clean-up of spills. Recover the dried product by vacuuming, shoveling, or sweeping. Vacuum must be fitted with HEPA filter to prevent release of particulates during clean-up. Liquid product can be wiped or mopped up and disposed of accordingly.

SECTION 7: Handling and Storage

Precautions for Safe Handling

Do not breathe dust. Avoid generation of dust during clean-up of spills. Recover the product by vacuuming, shoveling, or sweeping. Vacuum must be fitted with HEPA filter to prevent release of particulates during clean-up. Wear suitable protective clothing, gloves, and eye/face protection. If airborne dust is generated, use the appropriate NIOSH approved respiratory protection.

Conditions for Safe Storage

Store in original tightly closed container. Keep away from food, drink, and animal feeding stuffs. Use care in handling/storage. Store in accordance with local/regional/national/international regulation. Keep out of reach of children. Always use oldest stock first.

SECTION 8: Exposure Controls/Personal Protection

Control Parameters

Use in accordance with safest practices.

TLV: Threshold Limit Value of a chemical substance is a level to which it is believed a worker can be exposed day after day for a working lifetime without adverse health effects.

TWA: (Time Weighted Average – TLV-TWA): average exposure on the basis of a 8h/day, 40h/week work schedule

STEL: (Short Term Exposure Level) is an employee's 15-minute time weighted average exposure at any time during a work day and cannot be repeated more than 4 times in a day.

Personal Protective Equipment: Use chemical goggles or safety glasses and chemical resistant gloves while handling under normal conditions.

Respiratory Protection: Use an appropriate NIOSH approved respirator if airborne dust concentrations exceed the appropriate PEL or TLV. All requirements set forth in 29CFR1910.134 must be met.

Protective Gloves: Nitrile gloves are recommended. Be cautious as the liquid may penetrate the glove. Frequent change is advisable.

Ventilation: Provide adequate general and local exhaust ventilation.

Eye Protection: Chemical/splash goggles are recommended. Eye wash station must be present.
